ENAMUL HAQ CHOWDHURY
Senior Backend-Focused Software Engineer | Java, Spring Boot, Microservices
sakibenam3618@gmail.com | +880-1621-202529 | https://github.com/kaiyoken3618 | LinkedIn: Enamul Haq Chowdhury

SUMMARY

Senior Full-Stack Software Engineer with 5+ years designing scalable microservices and production-grade web applications using Java, Spring Boot, and modern distributed systems. I help organizations modernize legacy platforms and optimize high-volume data processing, delivering 200% performance improvements through strategic architecture decisions. Proven expertise spanning backend services, frontend integration, and cross-functional collaboration in agile environments.

EXPERIENCE

Synesis IT PLC – Senior Software Engineer – Bangladesh
Sep 2025 – Present

- Leading the modernization of the national E-TIN platform, migrating from a legacy monolithic architecture to a scalable microservices-based architecture.
- Designed and developed high-availability backend services using Java 21+, Spring Boot, and REST APIs.
- Optimized large-scale search and data processing across multiple entities, handling 80M+ records on average, achieving a 93% performance improvement through Elasticsearch integration, Redis caching, multithreaded processing, query optimization, and efficient database connection pooling.
- Implemented event-driven communication using RabbitMQ and API-based integrations. Strengthened application security using Spring Security, RBAC, and Two-Factor Authentication (2FA).
- Improved observability with distributed tracing (Zipkin), centralized configuration, and service discovery.
- Conducted code reviews and enforced engineering best practices to maintain code quality, scalability, and maintainability across backend services.
- Participated in sprint planning, estimation, and technical discussions to align delivery timelines with business requirements.
- Mentored and guided junior developers through code reviews, technical problem-solving, and knowledge sharing to improve team productivity and engineering standards.

Technonext – Full-Stack Software Developer – Dhaka
Feb 2025 – Sep 2025

- Designed and implemented a scalable Search Service using Spring Boot, Elasticsearch, and ELK Stack to support high-volume product discovery.
- Engineered high-performance data migration pipelines processing 500K+ records using Java multithreading and concurrent processing techniques.
- Built resilient inter-service communication using RabbitMQ and gRPC within a microservices-based architecture.
- Improved backend performance and reduced response latency through Redis caching and query optimization strategies.
- Monitored production systems using Grafana, ELK, and APM tools to identify bottlenecks and improve reliability.
- Collaborated with cross-functional teams to define requirements, document backend workflows, and deliver production-ready solutions.
- Containerized services using Docker to streamline deployment and environment consistency.

Syntax Solution Ltd – Full-Stack Software Developer – Dhaka
Jun 2024 – Feb 2025

- Designed and developed a scalable Catalog Service using Spring Boot 3, Java 21, and MongoDB within a production-grade microservices architecture.

- Developed RESTful APIs supporting business-critical workflows and frontend integration.
- Implemented secure authentication workflows including social login, OAuth, and OTP-based verification.
- Built service discovery and API gateway architecture using Netflix Eureka and Spring Cloud Gateway.
- Applied Test-Driven Development (TDD) practices using JUnit 5 and integration testing with Rest Assured.
- Configured HashiCorp Vault for secure secrets management and sensitive credential handling.
- Participated in Agile delivery cycles while collaborating with backend, frontend, and QA teams.
- Contributed to a distributed microservices ecosystem designed for scalability and maintainability.

Dynamic Megasoft Ltd – Full-Stack Software Developer – Remote
Oct 2022 – Jun 2024

- Built and optimized backend services using Spring Boot, improving query efficiency and supporting performance-critical business workflows at scale.
- Participated in code reviews and technical documentation to improve maintainability and engineering quality.
- Built reusable frontend components while supporting end-to-end feature delivery.

Pantheon Systems, Inc – Technical Support Engineer L3 – Remote
Mar 2021 – Jan 2023

- Diagnosed and resolved distributed system issues using logs and monitoring tools. Reproduced/debugged Solr and Redis performance issues.
- Developed an NLP-based project using NLTK, Keras, and SpaCy.

SKILLS

Programming: Java, TypeScript, C++, HTML, CSS, SASS
Backend Technologies: Spring Boot, REST APIs, gRPC, RabbitMQ, Redis, JWT, OAuth2, Spring Cloud Gateway, Consul.
Distributed Systems & Architecture: Microservices Architecture, Distributed Systems, API Design, Caching, Multithreading, Service Discovery, Backend Scalability.
Databases & Search: MySQL, MongoDB, SQL Server, Elasticsearch
DevOps & Infrastructure : Docker, ELK Stack, Grafana, APM Tools, HashiCorp Vault, Git, CI/CD Concepts
Testing: JUnit 5, Rest Assured, Postman

EDUCATION

Ahsanullah University of Science and Technology – B.Sc. in CSE – Dhaka, Bangladesh

- Undergraduate thesis paper published on IEEE: https://ieeexplore.ieee.org/document/9707392
CGPA: 3.35/4.00 | *Apr 2016 – Jan 2021*

Dhaka Residential Model College
HSC - GPA: 5.00/5.00
SSC - GPA: 5.00/5.00
